VOLUME II.

OCCUPATIONS AND DEFECTIVE SOCIAL AND PHYSICAL CONDITIONS.

INTRODUCTION.

The data presented in this volume represent the results of the tabulations relating to (A) the Occupations of the population and (B) the Socially and Physically Defective Classes.

The information relative to occupations was obtained at the time of the decennial enumeration of the people on May 1, 1905, but its publication in the regular series of census volumes appears not to have been a part of the original plan of the Bureau. The Legislature of 1908, however, took the ground, upon the representations of social workers, economists, statisticians, and others who appeared before it at the time, that, notwithstanding the lapse of three years since the information had been gathered, it was of sufficient social importance to warrant its tabulation and publication in a permanent volume that should be a part of the census series. As soon as possible, therefore, after the appropriation for the work was available, the task of drawing off the data from about 3,000,000 card schedules and the tabulation of the same was begun; and the preparation of the copy for the printer and the verification of the figures was proceeded with as rapidly as the matter was returned in proof. Some of the matter published in this volume has, however, already formed the basis of analytical treatment in issues of the Labor Bulletin of the Bureau of Statistics, while the tabulations, as soon as completed and verified, were placed at the disposal of inquirers without requiring them to await the final publication.

The first attempt to secure a comprehensive statement of the occupations of the people of the Commonwealth was made in the Census of 1875, and the individual family schedule used in that year was accompanied by the following instruction:

Where practicable, and especially where it may seem necessary for the sake of explicitness, every person, in respect to his trade, profession or occupation, is desired to state these three things, — the general name of the trade, the particular name of the branch followed, the material worked upon. As, "Factory Operative — Cotton Spinner." In many cases the general name indicates these three things, and is sufficient of itself, as, "Tinsmith." On the other hand, mechanics should, in no case, return themselves as mechanics, but should state the specific trade followed, as "Machinist," "Plumber," etc. In those trades which have subdivisions, they should also state the specific branch which they follow, as "Shoemaker — Laster," "Hatter — Finisher." So, factory operatives should give the specific name indicating the branch of work they perform, and the material worked upon, as "Factory Operative — Cotton Spooler"; "Factory Operative — Woolen Weaver." So, all engaged as workers in any and every kind of manufacturing process, should give firstly the general name, if there be one, indicating thus with some exactness the trade they follow and the material worked upon, and secondly, the specific name, indicating thus precisely the particular work they do.

Similar instructions were given for all persons employed in industrial processes, for those owning or hiring farms, those employed in stores as clerks and salesmen, the latter being required to specify the branch, as "dry goods," "drug," "grocery," etc., railroad officials and employees, physicians, clergymen, etc. The instruction for ministers was to add the denomination; in all respects the directions were full and complete. Persons having more than one occupation were instructed to give only the one upon which they chiefly depended for a livelihood; thus, for example, the number of constables, or postmasters, or municipal officers may not have been the actual number of postmasters, or constables, or municipal officers in the state, but was the number of those persons depending upon their earnings in such calling for their support.

In the Census of 1885, the family schedule, containing places for the entry of information for 12 persons, was discontinued and an individual card schedule was adopted, but practically the same instructions were given enumerators and the ascertaining of the occupations of the people was pointed out as being second only in importance to enumerating them. In the later Censuses of 1895 and 1905 the same general plan was pursued. From the Enumerators' Instruction Book for 1905 we quote the following:

Fifty years ago, a shoemaker made a whole shoe, and a tailor made a whole suit of clothes; at the present time, owing to the division and subdivision of labor, few workmen begin and complete any article of manufacture. In every branch of work the specialist has succeeded the general worker, and statistics of occupations at the present day must possess the most specific details or they will not satisfy the demands of the inquirer.

To secure the specific detail should be the first effort of the enumerator and specific occupation designations are desired. It has only been possible to include in these instructions the more important designations; but enough are given to supply a general idea of what is required, and having this idea you should not

rest satisfied with a designation that does not convey to you yourself the occupation of the person considered. If it is not satisfactory to you, it surely cannot be satisfactory to us; and if it is satisfactory to you and proves unsatisfactory to us it must be because you have not carefully read these instructions but have contented yourself with giving us an indefinite designation instead of securing a specific and definite one.

The classification of occupations is not, of course, left to the enumerator. He is simply expected to return on his schedules as much detail as possible without delaying his work, the examination and classification being made in the office previous to tabulation. The importance of the occupation enumeration being understood, the necessity of designations which shall have a uniform meaning is at once apparent. This matter was taken up in 1885 by Massachusetts and in 1900 by the United States Census authorities, and in the present volume an earnest effort has been made to reclassify the occupations of 1905 along the lines followed in 1900 by the United States, particular attention being given to related groups of trades and occupations. For this reason the classification of occupations as finally adopted for the Census of 1905 differs so materially from the classification used in the Census of 1895 that any comparison in detail with the results for that census would be of little value. It is furthermore to be said that a better enumeration was secured in 1905 so far as occupations are concerned, thereby admitting of a more careful distribution under the proper designations of occupations.

On pages 3, 4 and 5 appears a full explanation regarding the class and section heads of the occupation tabulation. Attention is called particularly to the class divisions Not Gainful, Retired, etc., on page 3, and on page 6 is given a method of reading the tables. These pages should be carefully read before studying the occupation tabulations.

The statistics relating to those persons within the Commonwealth who at the time of the census were found to be either physically or socially defective, or both, are presented in the second section of this volume. The classification of the schedules was made by Dr. Herbert B. Lang, and special studies made by him of the data relating to the deaf, dumb, deaf and dumb, the maimed, lame, and deformed, and of persons afflicted with acute and chronic diseases were published in 1908 and 1909 in the Massachusetts Labor Bulletin.

Miss Annie L. Flynn had charge of the tabulations of occupations, Miss A. Louise Foster of the verification of the statistics after their compilation, and Miss Margaret Shea supervised the preparation of the data relating to the socially and physically defective classes, and their painstaking industry and fidelity is entitled to the highest praise.

CHARLES F. GETTEMY,
Director, Bureau of Statistics.

State House, Boston, October 15, 1910.

ANALYSIS.

A. — Occupations.

The first of the four divisions of this volume relating to occupations embraces tabulations of selected occupations for the state and represents a division of the people into seven classes, with detail under 175 section heads. The seven classes are as follows:

Class A. Agricultural Pursuits
Class B. Professional Service
Class C. Domestic and Personal Service
Class D. Trade and Transportation
Class E. Manufacturing and Mechanical Pursuits
Class F. Apprentices
Class G. Not Gainful

Included in the "Not Gainful" are not only persons whose occupations are non-productive, but persons who have no occupations, such as the dependent, young persons at home, persons who have retired, etc., these classes being included for census purposes in order that the entire population may be accounted for in the tabulations.

The results for the state, showing in condensed form the number of persons returned for each of the seven general classes of occupations, appear in the table on page IX, from which it is seen that 68,578, or 4.69 per cent of the entire male population, are engaged in agricultural pursuits; that 41,990, or 2.87 per cent, are persons engaged in professional service, that is, are connected with religion, law, medicine, and similar pursuits, while 115,218, or 7.88 per cent, are engaged in domestic and personal service. The males engaged in trade and transportation number 269,794, or 18.46 per cent. The whole number of males engaged in manufacturing and mechanical pursuits was 448,647, or 30.70 per cent, and 7,365, or 0.50 per cent, were engaged as apprentices. We find, also, that there were reported 509,997 males, or 34.90 per cent, in the class "Not Gainful."

In a similar way, we find that 114,495, or 7.43 per cent of the whole number of females, were returned as being engaged in domestic and personal service; this number does not include the large body of housewives or persons engaged in housework without fixed compensation. There were engaged in manufacturing and mechanical pursuits 173,834 females, or 11.27 per cent, while 62,831 females, or 4.07 per cent, were engaged in trade and transportation, and 27,319 females, or 1.77 per cent, in professional pursuits. As will be expected, the class "Not Gainful" contains a large proportion of females, 1,161,416, or 75.32 per cent of the total number of females, being included.

A distribution of the entire population without regard to sex, both by number and by percentages, is shown in the table and need not be analyzed in detail, except to point out that of the whole population, 229,713, or 7.65 per cent, were engaged in domestic and personal service; 332,625, or 11.07 per cent, in trade and transportation, and 622,481, or 20.72 per cent, were engaged in manufacturing and mechanical pursuits.

The table, with percentages in each class, follows:

Classes of Occupations.	Number			Percentages		
	Males	Females	Both Sexes	Males	Females	Both Sexes
All Occupations.	1,461,589	1,542,091	3,003,680	100.00	100.00	100.00
A — Agricultural Pursuits,	68,578	1,065	69,643	4.69	0.07	2.32
B — Professional Service,	41,990	27,319	69,309	2.87	1.77	2.31
C — Domestic and Personal Service,	115,218	114,495	229,713	7.88	7.43	7.65
D — Trade and Transportation,	269,794	62,831	332,625	18.46	4.07	11.07
E — Manufacturing and Mechanical Pursuits,	448,647	173,834	622,481	30.70	11.27	20.72
F — Apprentices,	7,365	1,131	8,496	0.50	0.07	0.28
G — Not Gainful,	509,997	1,161,416	1,671,413	34.90	75.32	55.65

As regards the class "Not Gainful," 282,274, or 19.31 per cent of the whole number of males in the Commonwealth (1,461,589) were scholars and students; and 2.19 per cent had retired. Persons classified as "Retired" are those possessed of a competency, inherited or acquired, or who, for some reason, were not actively engaged in obtaining a subsistence, — as distinguished from persons classified as "Dependents," who are supported to a greater or less extent by relatives or friends. The dependent males numbered 15,404 and represented slightly over one per cent of all the males, and 161,984 males, or 11.08 per cent, were returned as "at home." There were, also, 15,539 males, or 1.06 per cent, whose occupation was "not stated"; that is, young persons and adults of working age who, for some reason, had no occupation or for whom no occupation was returned.

Of the females in the class "Not Gainful" we find that the housewives number 557,878, or 36.18 per cent of the whole number of females in the Commonwealth. By housewives are meant the female heads of the household, that is, the wife or some person in the family who has general charge of the domestic affairs. For those engaged in housework without fixed compensation, we find there are 92,853 persons only, 57 of whom are males. Of the total population, 565,744, or 18.84 per cent, are either scholars or students, the number of males and females reported being practically the same. The females classified as "Retired" numbered 15,595, or about one per cent of the whole, while those classified as "Dependent" numbered 14,565, or a little less than one per cent of the entire female population; the males and females in this class are

about evenly divided, numbering together 29,969, or one per cent of the entire population. Of persons "at home" there were 159,575, or 10.35 per cent, while the females for whom the occupation was "not stated" numbered 36,815, or 2.39 per cent. In the following table the subdivisions of the class "Not Gainful" are given in detail by number and percentages.

Classification.	Number			Percentages		
	Males	Females	Both Sexes	Males	Females	Both Sexes
Not Gainful Occupations.	509,997	1,161,416	1,671,413	100.00	100.00	100.00
Housewives,	–	557,878	557,878	–	48.04	33.38
Housework (without pay),	57	92,796	92,853	0.01	7.99	5.55
Scholars and students,	282,274	283,470	565,744	55.35	24.41	33.85
Unemployed twelve months,	2,726	722	3,448	0.53	0.06	0.21
Retired,	32,013	15,595	47,608	6.28	1.34	2.85
Dependent,	15,404	14,565	29,969	3.02	1.25	1.79
At home,	161,984	159,575	321,559	31.76	13.74	19.24
Not stated,	15,539	36,815	52,354	3.05	3.17	3.13

Summarizing the Remunerative and Not Gainful occupations and classifying the whole population into these two groups, we have the following division (from which it appears that 44.35 per cent of the population are engaged in remunerative occupations): —

Classification.	Males	Females	Both Sexes
Remunerative,	951,592	380,675	1,332,267
Not Gainful,	509,997	1,161,416	1,671,413
Totals,	1,461,589	1,542,091	3,003,680

From the presentation of classes of occupation by age periods, it appears that of the persons in the State who were engaged in manufacturing and mechanical pursuits, 36 per cent were between 16 and 24 years, 29.82 per cent were from 25 to 44 years of age, and 23.77 were from 45 to 64 years of age; and of the persons in the city of Boston in the same class of occupations, 22.37 per cent were between 16 and 24 years of age, 20.67 per cent were between 25 and 44 years of age, and 19.31 per cent from 45 to 64 years of age.

In the class Trade and Transportation, by age periods, larger percentages are shown in the city of Boston than in the State, owing probably to the fact that the larger portion of the clerical work for all lines of business is performed in Boston, there being a smaller proportion of manufacturing done in the city as compared with the rest of the State. The figures are given in the following table.

Occupations — The State — 1905 — Age Periods.

Classes of Occupations.	Under 15 Years	16 to 24 Years	25 to 44 Years	45 to 64 Years	65 Years and Over and Unknown	Totals
All Occupations.	851,092	496,991	990,087	498,265	167,245	3,003,680

Married Women and Mothers.

The relative fecundity of women of different nationalities, involving in its consideration the question of the comparative growth of the native and foreign-born population, is a subject of vital importance and one concerning which a great deal of information may be obtained by means of the Census. In the Census of 1875 a beginning was made towards securing information bearing on this point, so far as Massachusetts was concerned, but to a limited extent only. In that Census, an inquiry was made concerning "the number of children borne by women" and the results were printed in the Census reports and were further considered in the report of the Bureau for 1878. In the Census of 1885, a similar inquiry was made concerning women, the form of the inquiry being "Mother of how many children," and this inquiry was supplemented by another inquiry as to the "Number of these children now living," that is, on May 1, 1885.

The population schedule used for females in the State Census of 1905 contained the following inquiries relating to the subject of comparative maternity:

a. The age of the person
b. Conjugal condition; that is, whether married, widowed, or divorced
c. Number of years married
d. Number of children borne
e. Number of children living

f. Number of children deceased
g. In what year was first child born
h. In what year was last child born
i. Number of children borne by the mother of the persons for whom the return was made

(The child-bearing period was determined from the answers to g and h.)

The tabular presentations relating to married women and mothers contained in this volume cover in detail the occupations of the married women and mothers only. The explanatory text given on pages 3 to 6 should be read carefully in connection with the information presented in the tables. In all the presentations devoted to this subject the term "married women" includes all the women who are either married, widowed, or divorced.

From a tabulation of the returns, we find that of 710,626 married women in 1905, 390,763, or 54.99 per cent, were native born, and 319,863, or 45.01 per cent, were foreign-born. Of the total number of married women both native and foreign born, 80.73 per cent had children and 19.27 per cent had no children. Of the married women without children in 1905, the native born numbered 89,728, and constituted 65.52 per cent of the women in this class, while the foreign born numbered 47,225, and constituted 34.48 per cent. Of the 573,673 women with children in 1905, the native born numbered 301,035, or 52.48 per cent, and the foreign born, 272,638, or 47.52 per cent.

B. — The Socially and Physically Defective Classes.

The results for persons of defective social and physical conditions are presented in two sections: — I. On the basis of persons for counties, cities, and towns; II. On the basis of conditions for the State. The socially defective include prisoners, juvenile offenders, paupers, and neglected children. For census purposes the term "prisoner" comprehends persons found in prisons, jails, houses of correction, police stations and lock-ups, who are awaiting trial for an alleged offense, held as witnesses, serving out a fine, etc., or who have been tried and convicted and sentenced. The term "juvenile offender" comprehends children between 7 and 17 years of age who have committed an offense against the law and have been ordered by the courts to a reform school or to be boarded in a private family.[1] Under "paupers" are included all persons who, from disease, accident, intemperance, misfortune, or any other cause, have become dependent upon public charity. The term "neglected children" comprehends all neglected or dependent children, usually under 17 years of age, who are not living in their own homes and who are supported by public or private charity either in institutions or private families.

[1] The law establishing a juvenile court was approved as Chapter 489, Acts of 1906, and the first court was established in Boston on September 1, 1906.

a. The Socially Defective.

There were 31,666 persons in the Commonwealth on May 1, 1905, who were socially defective, of whom 6,763, or 21.36 per cent, were prisoners, 1,589, or 5.02 per cent, were juvenile offenders, 15,564, or 49.15 per cent, were paupers, and 7,750, or 24.47 per cent, were neglected children.

The table showing the number of socially defective persons by sex, and whether able-bodied or having some physical defect in addition to the social defect, appears as follows:

Classification.	Males	Females	Both Sexes
Prisoners.	6,055	708	6,763
Number able-bodied,	5,756	696	6,452
Number defective,	299	12	311
Juvenile Offenders.	1,348	241	1,589

A.

OCCUPATIONS.

OCCUPATIONS.

The presentation of occupations in this volume is shown in four parts as follows:

I. Selected Occupations for the State.
II. Selected Occupations for the City of Boston.
III. Occupations of Married Women and Mothers for the State.
IV. Occupations of Married Women and Mothers for the City of Boston.

The data given in Part I present selected occupations for the State, classified under seven general classes, with detail under each class. Part II gives similar data, but with less detail, for the city of Boston. In Parts III and IV the occupations are restricted to those pursued by married women and mothers, principally mothers.

In order that the figures may be comparable with those of other States and of the United States as a whole, the classification and terminology have been made to conform, so far as possible, with those used by the Federal Government in 1900,[1] and the information given in the first two parts has been correlated so as to show, by sex, the number of native born and foreign born, place of birth of father, age periods, conjugal condition, color and race, parent and grandparent nativity, and degree of illiteracy, in as much detail as space will permit.

The presentations of occupations for married women and mothers, in Parts III and IV, exhibit, by native and foreign born, the total number of married women, the number having *no* children, the number of mothers, and the average number of children. These are followed by the number of mothers, classified by conjugal condition (married, widowed, divorced, or unknown); color and race (white, colored, and other); age periods; degree of illiteracy; and parent nativity.

The arrangement of occupations is alphabetical under class heads, and the designations, so far as possible, have been made to include all persons engaged in the same kinds of work.

The class divisions are self-explanatory, but a word may be said of "not gainful." Under this class heading are the following: "housewives," "housework" (persons engaged in housework without pay), "scholars" (pupils attending public and private schools), "students" (persons at college or studying special branches, as law, dentistry, medicine, etc.), "retired" (including those not engaged in active business pursuits who possess a competency, inherited or acquired), "unemployed twelve months" (persons not employed at all during the census year at their accustomed occupations), "dependents" (persons in private families or institutions dependent upon relatives or friends or public or private charity for their support), "at home" (children 10 years of age or under who do not attend school), and "not given" (young persons or adults of working age who, for some reason, have no occupation or for whom no occupation was returned).

[1] Occupations in the Twelfth Census, Washington, D. C., 1904.

The classes are as follows, the sections (so-called) under each class being given in detail:

CLASS A. *Agricultural Pursuits.* This class includes farmers, gardeners, florists, farm and garden laborers, and persons engaged in the care of animals, etc., as follows:

1. Agricultural laborers.
2. Dairymen and dairywomen.
3. Farmers, planters, and overseers.
4. Gardeners, florists, nurserymen, etc.
5. Lumbermen and raftsmen.
6. Stock raisers, herders, and drovers.
7. Wood choppers.
8. Other agricultural pursuits.

CLASS B. *Professional Service.* This class includes persons whose occupations are in connection with religion, law, medicine, literature, art, music, amusements, education, science, etc., as follows:

1. Actors, professional showmen, etc.
2. Architects, designers, draftsmen, etc.
3. Artists and teachers of art.
4. Clergymen, etc.
5. Dentists.
6. Electricians.
7. Engineers (civil, etc.) and surveyors.
8. Government officials.
9. Journalists.
10. Lawyers.
11. Literary and scientific persons.
12. Musicians and teachers of music.
13. Physicians and surgeons.
14. Teachers and professors in schools and colleges.
15. Other professional service.

CLASS C. *Domestic and Personal Service.* This class includes persons engaged in family, hotel, restaurant, and boarding and lodging-house service, and those who render personal service, such as barbers, bartenders, bootblacks, janitors, matrons, nurses, valets, watchmen, etc., as follows:

1. Barbers and hairdressers.
2. Bartenders.
3. Boarding and lodging-house keepers.
4. Hotel keepers.
5. House and office cleaners.
6. Housekeepers and stewards.
7. Janitors and sextons.
8. Laborers.
9. Launderers and laundresses.
10. Nurses and midwives.
11. Restaurant keepers.
12. Saloon keepers.
13. Servants and waiters.
14. Soldiers, sailors, and marines (U. S.).
15. Watchmen, policemen, firemen, etc.
16. Other domestic and personal service.

CLASS D. *Trade and Transportation.* This class includes merchants and dealers, salesmen and saleswomen, bookkeepers, clerks, agents, bankers, brokers, messengers, porters, stenographers, undertakers, carriers on roads, steam railroads, seas and rivers, etc., as follows:

1. Agents.
2. Bankers and brokers.
3. Boatmen and sailors.
4. Bookkeepers and accountants.
5. Clerks and copyists.
6. Commercial travelers.
7. Contractors and importers.
8. Draymen, hackman, teamsters, etc.
9. Foremen and overseers.
10. Hostlers.
11. Hucksters and peddlers.
12. Livery stable keepers.
13. Merchants and dealers.
14. Messengers and errand and office boys.
15. Officials of banks and companies.
16. Packers and shippers.
17. Porters and helpers (in stores, etc.).
18. Salesmen and saleswomen.
19. Steam railroad employees.
20. Steamship employees.
21. Stenographers and typewriters.
22. Street railway employees.
23. Telegraph and telephone linemen.
24. Telegraph and telephone operators.
25. Undertakers.
26. Other persons than those mentioned in detail engaged in trade and transportation.

CLASS E. *Manufacturing and Mechanical Pursuits.* This class includes persons employed in the various manufacturing and mechanical industries and those engaged in fisheries, mining, quarrying, etc., as follows:

1. Artificial flower makers.
2. Automobile makers and repairers.
3. Bakers.
4. Basket makers.
5. Blacksmiths.
6. Bleachery and dye works operatives.

7. Bookbinders.
8. Boot and shoe makers and repairers.
9. Bottlers and soda water makers, etc.
10. Box makers (paper).
11. Box makers (wood).
12. Brassworkers.
13. Brewers and maltsters.
14. Brick and tile makers.
15. Broom and brush makers.
16. Building trades, other than those specified in detail.
17. Butchers.
18. Butter and cheese makers.
19. Buttonmakers.
20. Cabinet makers.
21. Candle, soap, and tallow makers.
22. Carpenters and joiners.
23. Carpet factory operatives.
24. Car shop employees (steam and street railway).
25. Carriage and wagon factory employees.
26. Charcoal, coke, and lime burners.
27. Chemical works employees.
28. Clock and watch makers and repairers.
29. Confectioners.
30. Contractors and builders.
31. Coopers.
32. Copper workers.
33. Corset makers.
34. Cotton mill operatives.
35. Distillers and rectifiers.
36. Dressmakers.
37. Electric light and power company employees.
38. Electroplaters.
39. Engineers and firemen (not locomotive).
40. Engravers.
41. Fertilizer makers.
42. Fishermen and oystermen.
43. Fish factory employees.
44. Food products, other than those specified in detail.
45. Flax mill operatives.
46. Furniture manufactory employees.
47. Gas works employees.
48. Glass workers.
49. Glove makers.
50. Gold and silver workers.
51. Gunsmiths, locksmiths, and bell hangers.
52. Harness and saddle makers and repairers.
53. Hat and cap makers.
54. Hemp and jute mill operatives.
55. Hosiery and knitting mill operatives.
56. Iron and steel workers.
57. Jewelry manufactory employees.
58. Lace and embroidery makers.
59. Lead and zinc workers.
60. Leather curriers and tanners.
61. Linen mill operatives.
62. Machinists.
63. Manufacturers and officials, etc.
64. Marble and stone cutters.
65. Masons (brick and stone).
66. Meat, fish, and fruit packers, canners, etc.
67. Metal workers, other than those specified in detail.
68. Millers.
69. Milliners.
70. Miners and quarrymen.
71. Model and pattern makers.
72. Musical instrument makers.
73. Oil works employees.
74. Painters, glaziers, and varnishers.
75. Paper and pulp mill operatives.
76. Paperhangers.
77. Photographers.
78. Piano and organ makers.
79. Piano and organ tuners.
80. Plasterers.
81. Plumbers and gas and steam fitters.
82. Polish and dressing makers.
83. Potters.
84. Powder and cartridge makers.
85. Printers, lithographers, and pressmen.
86. Print works operatives.
87. Roofers and slaters.
88. Rope and cordage factory operatives.
89. Rubber factory operatives.
90. Sail, awning, and tent makers.
91. Saw and planing mill employees.
92. Seamstresses.
93. Sewing machine operators (salesrooms).
94. Shirt, collar, and cuff makers.
95. Silk mill operatives.
96. Starch makers.
97. Statuary makers.
98. Steam boiler makers.
99. Stove, furnace, and grate makers.
100. Straw workers.
101. Sugar makers and refiners.
102. Tailors and tailoresses.
103. Textile mill operatives (not otherwise specified).
104. Tin plate and tinware makers.
105. Tobacco and cigar factory operatives.
106. Tool and cutlery makers.
107. Trunk and leather-case makers, etc.
108. Umbrella and parasol makers.
109. Upholsterers.
110. Vessel builders and repairers.
111. Wheelwrights.
112. Whitewashers.
113. Wireworkers.
114. Woodworkers, other than those specified.
115. Woolen mill operatives.
116. Worsted mill operatives.
117. Other manufacturing and mechanical pursuits.

CLASS F. *Apprentices.* This class includes persons learning trades in different branches of manufacture, etc.

CLASS G. *Not Gainful.* This class includes persons whose occupations are unproductive, as follows:

1. Housewives.
2. Housework without pay.
3. Scholars and students.
4. Unemployed twelve months.
5. Retired.
6. Dependents.
7. At home.
8. Not stated.

METHOD OF READING TABLES.

The general method of reading the several presentations in Parts I and II is as follows: Considering "Cranberry-bog laborers," under the class head of "Agricultural Pursuits," and section head of "Agricultural Laborers," shown on page 6, we find that there were reported 896 males, of whom 148 were native born and 748 foreign born; these constituted, for Census purposes, what has been termed the *first* generation. Of these same 896 males, 93 had native fathers and 803 had foreign fathers; these fathers comprised, for Census purposes, the *second* generation. The grandparents of 90 were native born, the grandparents of 803 were foreign born, and the grandparents of three were of mixed or unknown birth; these constituted, for Census purposes, the *third* generation. Of the 896 males, 341 were white, 553 were colored, and two were Indian, Chinese, or some other race; 702 were either single or of unknown conjugal condition; 184 were married, and 10 were either widowed or divorced. Four were under 15 years of age, 384 were between 16 and 24 years of age, 430 were between 25 and 44 years of age, 72 were between 45 and 64 years of age, and six were 65 years of age or over or of unknown age. Six of these persons could not write and 244 could neither read nor write. Of the 93 males who had native fathers, 80 of the latter were born in Massachusetts and 13 were born in other states of the Union. Of the 803 males whose fathers were born in foreign countries 603 of the latter were born in Portugal, 64 were born in Russia, 42 in Canada, of French extraction, 35 in Ireland, 33 in Italy, and 26 were born in other countries specified in the table. Other lines in Parts I and II may be read in a similar manner.

A like method should be adopted in reading Parts III and IV. Taking "agricultural laborers," on page 179, for example, we learn that there were in all 108, 23 of whom were native born and 85 foreign born. These 108 were married, widowed, divorced, or of unknown conjugal condition; 26 of them had no children or the number of children born was unknown; and 82 had on an average five children each. Of the 82 mothers, 63 were married, 17 were widowed, and two were either divorced or of unknown conjugal condition; 76 were white and six were colored; 13 were from 20 to 29 years of age, 19 were from 30 to 39 years of age, 29 were from 40 to 49 years of age, and 21 were 50 years of age or over, or of age unknown; 18 of the 82 mothers had a native or unknown father and a native mother, 63 had both parents foreign born, and one had a foreign father and a native mother; one of the 82 mothers could not write and 54 could neither read nor write. Other lines in Parts III and IV may be read in a similar manner.

B.

DEFECTIVE SOCIAL AND PHYSICAL CONDITION.

I.

Defective Social and Physical Condition.

On the Basis of Persons.

For Cities, Towns, and Counties.

I.

DEFECTIVE SOCIAL AND PHYSICAL CONDITION: BY COUNTIES, CITIES, AND TOWNS.

[The first presentation for defective social and physical condition is on the basis of *persons* and includes all those who on May 1, 1905, were socially or physically defective. The socially defective classes are termed Prisoners, Juvenile Offenders, Paupers, and Neglected Children; the physically defective includes the blind, deaf, deformed, epileptic, insane, lame, etc., and all persons who were suffering from acute or chronic diseases on the date specified.

The term "prisoner" comprehends persons found in prisons, jails, houses of correction, police stations, and lock-ups, who are awaiting trial for an alleged offence, held as witnesses, serving out a fine, being detained for debt or insanity, or who have been tried and convicted and sentenced to imprisonment or death. Prisoners are found only in institutions. The term "juvenile offender" comprehends children between seven and 17 years of age who have committed an offence against the law and have been ordered by the courts to a reform school or to be boarded in a private family.

Under "paupers" are included all persons who from disease, accident, intemperance, misfortune, or any other cause have become dependent upon public charity. The term "neglected children" comprehends all neglected or dependent children, usually under 17 years of age, who are not living in their own homes and who are supported by public or private charity, either in institutions or in private families. Where they are wards of the State, they are under the direction of the State Board of Charity until the age of 21.

In this presentation a person is counted but once, notwithstanding the fact that three or more defective physical conditions may be attributed to him. The information is given for males, females, and both sexes by towns, followed by a county and two State recapitulations. The towns are arranged alphabetically under their respective counties, and under the classification for each town the arrangement of defective social or physical condition is alphabetical, those who have one defective condition either social or physical coming first, followed by persons having two, three, or four defective social or physical conditions, as the case may be.

In the second State recapitulation, the males and females, as classified in the preceding showing, have been subdivided into native and foreign born.

The proper method of reading this table is as follows: In the town of Barnstable, on May 1, 1905, there were three persons suffering from acute diseases; eight who were blind; 66 who had a chronic ailment; 31 who were deaf; eight ablebodied prisoners and one prisoner who was also afflicted with a chronic disease; five persons who were insane-paupers, etc. Other towns may be read in a similar manner.]

COUNTY OF BARNSTABLE

Classification of Conditions.	Males	Females	Both Sexes
Town of Barnstable.			
Acute diseases,	2	1	3
Blind,	4	4	8
Chronic diseases,	35	31	66

II.

Defective Social and Physical Condition.

On the Basis of Conditions.

For the State.

II.

DEFECTIVE SOCIAL AND PHYSICAL CONDITION: ON THE BASIS OF CONDITIONS. FOR THE STATE.

The presentations which follow are given by conditions; that is to say, all persons suffering from acute diseases on May 1, 1905 are shown, regardless of the fact that they may also be afflicted with blindness, chronic diseases, consumption, deafness, deformity, epilepsy, feeble-mindedness, etc., or that they may be socially defective, viz.: paupers, prisoners, juvenile offenders, or neglected children. If a person has more than one defective physical or social condition, he must necessarily be counted in more than one section. In this manner duplications are made successively for each of the conditions, two, three, or four as the case may be, and from the presentations in this section, only, is it possible to determine the whole number of the blind, insane, lame, epileptic, paupers, etc., those afflicted with acute or chronic diseases, or other specified defective condition. For this reason, while each of the section aggregates represents correctly the number of persons afflicted with the particular defect to which the section relates, the whole number of persons physically and socially defective in the State is materially less than the sum of the section totals.

The first presentation in each section classifies the persons having the physical or social defect named by native and foreign born, sex, age periods, length of residence in the United States, political condition, where applicable, and illiteracy. The native-born persons are considered in three classes: Native born of native descent, that is, having fathers also native born; native born of foreign descent, including native-born persons having fathers foreign born; and native born of unknown descent, including native-born persons the birthplaces of whose fathers could not be ascertained. The foreign-born males are considered in three classes: Foreign-born naturalized, including males 21 years of age and over who have complied with the naturalization laws of the United States; foreign-born aliens, including foreign-born males 21 years of age and over who have not complied with the constitutional requirements; and all other foreign-born persons, including those of foreign birth neither naturalized nor aliens.

The second presentation in each section classifies the persons having the defective conditions specified, by sex and age periods, according to color and race and conjugal condition. For the *socially* defective conditions, namely, prisoners, paupers, juvenile offenders, and neglected children, and for the insane, the epileptic, and the feeble-minded, special tables are shown giving actual place of birth and parent nativity of the persons included.

The order of presentation by sections is as follows:

1. Acute diseases
2. Blind
3. Chronic diseases
4. Consumptive
5. Deaf
6. Deaf and dumb
7. Dumb
8. Deformed
9. Epileptic
10. Feeble-minded
11. Insane
12. Juvenile offenders
13. Lame
14. Maimed
15. Neglected children
16. Paupers
17. Prisoners
18. Other defective physical conditions
